
CEXT – Chimera Exchange Token White Paper

Abstract

CEXT (Chimera Exchange Token) is the native utility token of Chimera Exchange, developed to boost user engagement, incentivize long-term participation, and optimize trading efficiency through a multi-layered reward structure. Designed with a total fixed supply of 1 billion tokens. The token underpins a dynamic ecosystem that prioritizes community empowerment, advanced user incentives, and sustainable economic models. This white paper outlines the foundational architecture, tokenomics, distribution model, and strategic advantages of CEXT compared to other leading exchange tokens.

1. Token Overview

- Token Name: Chimera Exchange Token
 - Ticker Symbol: CEXT
 - Total Supply: 1,000,000,000 CEXT
 - Blockchain Support: Multichain
 - Primary Exchange: Chimera Exchange (CEX)
 - Secondary Markets: Leading Decentralized Exchanges
 - Launch Date: Q2 2026
-

2. Issuance

CEXT has a fixed, non-inflationary maximum supply of 1,000,000,000 tokens. Token initial sales follow a phased distribution schedule, with mechanisms in place to ensure deflationary pressure and equitable distribution.

3. Tier-Based Incentive System

CEXT introduces a 4-Tier Incentive Model, with benefits unlocked based on average token holdings over a 30-day period from the time of first deposit. This gamified reward structure strengthens user retention and creates a ladder of increasing privileges.

Tier Matrix

Tier	Average Monthly Balance	Trading Fee Discount	Referral Bonus	Support Access	News Access	Listing Discount
Tier 1	≥ 10,000 CEXT	20%	1×	Standard	Public	Basic
Tier 2	≥ 100,000 CEXT	30%	1.5×	Priority	+12 Hours	Moderate
Tier 3	≥ 1,000,000 CEXT	40%	2×	Premium	+24 Hours	High
Tier 4	≥ 10,000,000 CEXT	50%	3×	Direct	+24 Hours	Full + Proposal Rights

Example:

A Tier 3 user executing trades worth \$100,000 would save about \$100 in fees compared to standard rates. They would also earn double the referral bonus and receive curated news 24 hours before the public.

4. Utility and Benefits

CEXT is embedded in every facet of Chimera Exchange operations, offering meaningful benefits to both casual traders and long-term stakeholders.

Key Utilities

- **Trading Fee Discounts:** Progressive discounts, enhanced when using CEXT for fee payments.
- **Premium Support Channels:** Tier 3 and above gain access to real-time support from human representatives.
- **Referral Bonus Multipliers:** Increased referral rewards up to 3x, empowering community-driven growth.
- **Early Access to Listings and Announcements:** Get news 12–24 hours early based on tier.
- **Governance Rights (Planned):** Tier 4 users gain voting privileges to propose and influence listings, fee changes, and more.
- **Fee Payments:** Trading, listing, and promotional fees can be paid in CEXT.

5. Comparative Analysis with Other Exchange Tokens

Feature	CEXT (Chimera)	BNB (Binance)	KCS (KuCoin)	OKB (OKX)
Total Supply	1,000,000,000	200,000,000	170,000,000	300,000,000
Trading Fee Discount	Up to 50%	Up to 25%	Up to 30%	Up to 40%
Referral Bonus	Up to 3x	Standard	Standard	Standard
Premium Support	Yes (Tier 3+)	VIP Only	Limited	Limited

Early News Access	Yes (24h)	No	No	No
Listing Influence	Yes (Tier 4)	No	No	No
Governance Rights	Planned	Limited	Limited	Limited

7. Governance and Roadmap

ARK mobile app (Q4 2025)

ARK based mobile application:

- The core of Chimera activities
- First mobile app based on the new ARK VTXO tech

TGE (Q2 2026)

Issuance of the CEXT token:

- Native on ETH
- To be bridged on native ARK assets

Card Integration (Q2 2026)

Chimera Debit Card program :

- Partnership with Wirex pay
- Crypto native card program supporting CEXT recharge.

Cross-Chain Support (2026)

CEXT will expand to major L1 and L2 networks, enabling:

- Multi-chain staking
- Cross-chain swaps

Decentralized Governance (2027)

Governance will begin with Tier 4 CEXT holders gaining access to proposals and voting tools for:

- Token listings
- Feature requests
- Tiers management

DAO Transition (2028)

CEXT will gradually shift toward DAO governance:

- Token-weighted voting
 - Token proposals and upgrades
-

8. Conclusion

CEXT merges the best elements of utility, user incentives, and governance within a deflation-aware economic model. Unlike legacy tokens that focus solely on fee reductions, CEXT reimagines token value through real-world utility, structured rewards, and a future-focused roadmap.

With its robust tier system and cross-chain expansion goals, CEXT is engineered to foster a decentralized, transparent, and highly engaging user experience. As Chimera Exchange continues to grow, CEXT holders will benefit from the platform's success, creating a mutually reinforcing ecosystem designed for long-term sustainability and innovation.
